Stanford Institute for Economic Policy Research
John A. and Cynthia Fry Gunn Building, Office 222
366 Galvez St, Stanford, CA 94305

Last updated: August 2024
Citizenship: French
Year of birth: 1994

Employment

Postdoctoral Fellow, Stanford Institute of Economic Policy Research (SIEPR)	2024-2025
Assistant Professor, Sciences Po Paris	2025-

Education

PhD in Economics, University College London	2024
<i>Committee: Morten O. Ravn, Ralph Luetticke, Franck Portier</i>	
MRes in Economics, University College London	2017
MSc in Economics, Sciences Po Paris	2016
BA in Social Sciences, Sciences Po Paris	2014

Research Areas

Macroeconomics, Spatial Economics, Household Finance

Working Papers

"The Spatial and Distributive Implications of Working-from-home: A General Equilibrium Model"
(job market paper)

Abstract: I study the impact of the recent rise in remote work on households' consumption, wealth and housing decisions, examining both short-run and long-run effects. Using detailed UK property-level housing data and a heterogeneous agent model with endogenous housing tenure and city geography, I show that remote work shifts housing demand by increasing the taste for space and reducing commuting costs. It affects where people live in the city and their housing wealth accumulation. The effects vary by access to remote work, income, and wealth. The rise in work-from-home can be compared to a city-wide gentrification shock as wealthy telecommuters opt for larger suburban homes, displacing marginal owners who turn to renting. In the long-run, work-from-home leads to the rise of a *tele-premium* and consumption inequality increases.

"Durable Consumption during the Great Recession: the Role of *Ex-ante* Heterogeneity"

Abstract: This paper studies the impact of risk heterogeneity on durable consumption over the business cycle. I examine household risk heterogeneity through the lens of labour contract type, and document that during the Great Recession, fixed-term contract workers reduced their car purchases significantly more than their permanent counterparts. Using an incomplete market model of durable and non-durable consumption with a dual labour market, I show that households that experienced an increase in downside income risk (such as permanent contract holders) adopted a "wait-and-see" strategy for their durable purchases, while households that experienced a decline in upside income risk (such as fixed-term contract holders) adopted a "wait-to-downgrade" approach. In addition, a car purchase subsidy has limited ability to stimulate durable consumption of households facing a decline in their upside income risk and is, *de facto*, partly transformed into a *downgrading subsidy*.

Work in Progress

"Fiscal Policy with Heterogeneity in Durable Consumption" with Albert Hidalgo and Ralph Luetticke

Abstract: The recent HANK literature reassesses fiscal and monetary policy with heterogeneity in MPCs. This is typically done in a model with only non-durable consumption, and the evidence on MPCs is interpreted through this lens. However, most of the heterogeneity in MPCs stems from differences in the choice of durable consumption. This paper builds a HANK model with durable and non-durable consumption that is consistent with the novel evidence of heterogeneity in the marginal propensity to consume durables and, importantly, heterogeneity in inter-temporal substitution in durables. We use the model to study the effects and transmission

of fiscal policy, investigating if durables increase the state dependence of fiscal policy (i.e. is fiscal policy less effective in recessions because households delay purchases of durables?). Additionally, we look at whether the importance of durables increases the need for fiscal and monetary policy coordination.

”Winners and Losers from Monetary Policy: Evidence from the UK Rental Market” with Thomas Lazarowicz

Abstract: This paper estimates the heterogenous effects of monetary policy across a novel dimension, housing tenure. Using microdata from one of the UK’s largest property rental and sales websites, we show that a contractionary shock to the policy rate leads to 1) an increase in rental prices and simultaneously 2) a fall in house prices. The granular microdata also allows us to demonstrate that a contractionary shock leads to a decrease in the listing rate of rental properties, suggesting that this heterogenous response across rents and house prices is not solely driven by household tenure decisions, but also by a rental supply channel. Finally, our identification approach does not lead to the typical ‘price puzzle’ found in many monetary VARs, suggesting that while contractionary policy lowers inflation, inflation incidence is heterogenous across housing tenure and implies a new distributional channel of monetary policy.

Seminars

2024 University of Bristol, HEC Paris, EIEF, University of Chicago, Sciences Po, University of Copenhagen, University of Warwick, Bank of England, Toulouse School of Economics, IIES, Cambridge, UPF, University of Michigan, University of St. Gallen, University of Tübingen, Stanford University*, REStud North America Tour* (Arizona State University, University of Maryland, Washington University of St. Louis), Columbia Business School*, Queen’s University*, Uppsala University*

2023 UCL Macro Work-in-Progress, UCL PhD seminar, UC3M Enter seminar

2022 UCL Macro Work-in-Progress, UCL PhD seminar

2021 UCL Macro Work-in-Progress (online)

** scheduled*

Conferences and Workshops

2024 London E1 Workshop in Quantitative Macro, T2M (invited Young Economists Session), European Meeting of the Urban Economics Association, ECB Forum in Sintra (poster), SITE: Housing and Urban Economics*, USC Marshall Macro Day*

2023 RES conference, HEC Econ PhD conference, UCL-Surrey Macro workshop, Vigo Workshop of Dynamic Macroeconomics, CESifo Area Conference on Macro, Money, and International Finance, Normac Symposium, EEA Summer Meeting, Summer Meeting of Young Economists, PSE Macro Days, UCL Research Days

2022 CEPR WE-ARE-IN Conference in Basel, Naples PhD workshop, ENTER Jamboree (Barcelona), 4th PhD Workshop at Queen Mary University London

** scheduled*

Teaching

Advanced Macroeconomics, Undergraduate, UCL	2018-2024
Mathematics for Economists, Undergraduate, UCL	2017-2023
PhD Macroeconomics, Graduate, UCL	2018-2022
PhD Macroeconomics, Graduate, London Business School	2019

Awards and Honors

REStud North America Tour	2024
Finalist of the ECB Young Economist Prize	2024
UCL NSA Fellowship	2023-2024
Excellence in Teaching Award	2022
Excellence in Teaching Award, <i>Best Overall TA</i>	2019
Excellence in Teaching Award	2018

Professional and Volunteering Experience

Observatory of the French Economic Conjuncture (OFCE) <i>Research Assistant for Pierre Madec</i>	Paris, France 2015
Scoubidoo Sciences Po <i>Tutoring students in deprived neighborhoods</i>	Paris, France 2011-2013

Skills

Computational: Julia, Matlab, Python, Stata
Languages: French (native), English (Fluent), German (Beginner)
